Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 10, 2009 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, it is unclear whether the "different distance" is measured from the apex of the trial bearing liner or the apex of the trial shell. It is suggested that the point of reference for measurement of the distance of each of the trial bearing liner attachment passages and each of the trial shell attachment passages be clearly stated in the claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolesky et al. (US 5,002,577).

Bolesky et al. disclose a system including: a bearing or "trial bearing liner" 14; an adapter or "lock ring" 24; and an attachment member 32 that is engageable with a bore or hole 30 in the acetabular prosthesis or cup or "trial shell" 12 (Fig. 1 and col. 3, lines 26-68, and cols. 4-5).

Regarding claim 7, the various attachment passages or holes 30 and 40 in each of the trial shell 12 and the trial bearing liner 14 are offset a different distance from an apex of the trial shell or the trial bearing liner (Fig. 3).

It is noted that the recitation "trial bearing liner" and "trial shell" amounts to intended use. A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

Response to Arguments

Applicant's arguments filed on July 10, 2009 have been fully considered and are persuasive. New grounds of rejection have been made in this action.

Allowable Subject Matter

Claims 1-3, 5-6, 8-16, 18-21, 23-24, 26-29, and 31-35 are allowed.
